

Sodium Bicarbonate: GMO-Free Statement

The manufacture of Genesis Sodium bicarbonate is based on the refining of trona ore, a naturally occurring mineral found in the Southwest region of Wyoming in the United States. The product is neither manufactured with nor does it contain any Genetically Modified Organisms (GMOs). Under the NGP standard sodium bicarbonate is considered a Non-Risk material (Non-Risk Materials that are not derived from biological organisms and are not, therefore, susceptible to genetic modification) and is exempt from EC 1829/2003 & EC 1830/2003.

In addition, Genesis Alkali Sodium Bicarbonate is a single ingredient product that is manufactured without inputs and processes involving microorganisms, enzymes, synthetic biology, animal derived materials, or plant derived materials.

Genesis Alkali offers sodium bicarbonate products listed with OMRI (Organic Materials Review Institute). OMRI listed product certificates are available on our website.

Read the product Safety Data Sheet (SDS) prior to using the chemical.
