BlueCare DentalSM

BlueCare Dental is a fee-for-service indemnity dental plan. You and your eligible dependents can receive care from any licensed dentist in the country and still be covered. Eligible members include your spouse and eligible dependent children.

There is no need to select a primary care dentist and you do not have network requirements, so you can see a general or specialty dentist at any time without a referral.

Preventive care services are paid at the highest benefit level, to encourage you and your family to get routine dental care that helps promote good oral health. The plan also features coverage for primary and major services, while orthodontia coverage is available for eligible dependent children up to age 19.
